Co-Op FTTP
Fiber Optic Internet*

WIRED HOMES

*Promoting Simple
Low Cost, Wired
Solutions*

WIRED SCHOOLS

*Promoting wired
connectivity.
Eliminate Wi-Fi.*

We Need You! The World Needs You!

Are you concerned about the health effects of wireless technology? Do you have privacy concerns regarding smart metering or 5G grids?

We need all hands on deck!
Together, we change the world!

Do you have an idea for what you could do to educate your community? Do you have special skills and gifts that you can offer to this cause? Do you have money you can donate to help us with legal fees?

Please let us know your passions, your ideas and what you are willing to offer. Your efforts are needed. You matter!
Thank you!

HALT 5G! PROMOTE SAFE-G

We promote Fiber to the Premises (FTTP): Fiber optic connection direct to our homes, schools, & businesses. No need for wireless.

- Small Cell Towers (WTFs) are not needed to provide internet connection or communication.
- WTFs are not proven safe for humans, animals, and insects.
- WTFs are a potential fire hazard, are unsightly and will lower property values.
- 5G is not "SMART" - the science shows us that the opposite is true.
- 5G grids through strategic positioning of WTFs pose security risks and potential for privacy violations.

Learn the science and join us in our effort to halt the installation of WTFs in our neighborhoods at spokanewired.org/no5g.html

Wired is the solution. Wired is the future. The FCC is being sued for neglecting to update regulations over the past 25 years to reflect recent scientific study.

WIRED HOME SOLUTIONS

Yes! You can have your tech and wire it too. Start reducing RF & EMF exposure today:

- Utilize Ethernet to connect to the internet for computers, tablets & printers.
- If you use WiFi, turn off when not in use. Turn WiFi off at night with a timer.
- Use hard-wired phones instead of cell or cordless phones. VoIP or Landline.
- Keep cell phone away from your body, your head, your reproductive organs. Text instead. No phone in bedroom.
- With Children, always use Airplane-Mode. Keep the phone/baby monitor away from baby's body, head & eyes.
- Put your internet TV devices, home sound systems, wireless printers on a switch. Cut power when not in use.
- Avoid "smart" tech including smart homes, thermostats, speakers, electricity meters. Consider turning off bedroom breaker for better sleep.

HEALTHY DISTRICT SCHOOLS

We support preparing our children for the future and supporting their health & development by eliminating WiFi and utilizing wired Ethernet connections in schools.

WiFi is not proven safe having never been premarket tested for children's safety. Since long term health risk assessment was never done by the FDA, CDC, NCI or EPA, WiFi use in schools is wholly inappropriate. We must not experiment on our kids!

A growing amount of scientific research links this wireless radiation to serious health effects—such as memory and sleep problems, headaches, cancer, and damage to brain development. Pulsed radio waves from a WiFi router overhead in the classroom exposes our children to RF levels like that of a cell phone tower across the street.

Gradeschool aged children do not need computers or tablets in school. Scientific research suggest that screen time is also hazardous to brain development. Our middle and high-school age children can work on & with computers using a wired connection.

Putting WiFi in schools was a grave mistake. We promote replacing wireless with wired immediately to protect our children's health.

Furthermore, we assert that installing cell towers and 5G in or near schools is a crime against children & a crime against humanity.

Adverse Health Effects of Wireless Radiation on Humans

Metabolic Disturbance	Reactive Oxygen Species Generation	Genotoxicity and Carcinogenicity	Immunotoxicity and Inflammation	Apoptosis and Necrosis
Discomfort Symptoms	Sensory Disorders	Sleep Disorders	Congenital Abnormalities	Precancerous Conditions
CANCER	NEURODEGENERATION	INFERTILITY	NEUROBEHAVIORAL	CARDIOVASCULAR
